

ABSTRACT

A portable precast slab that provides a foundation for a variety of industrial equipment that can be placed at locations where permanent foundations cannot be installed, or where an immediately usable foundation is needed. The slab is preferably about 4" – 24" in thickness, preferably at least about 6' in length, and preferably at least about 6' in width; multiple pieces may be used to form the slab. The slab may have attachment means incorporated in order to move the slab. If a bulk storage tank is placed upon the slab, preferably at least about 8 feet by about 8 feet area adjacent to the tank will be available for delivery of liquid cryogen. A method of making and using the slab is also contemplated, and the slab may also be used as a splash pad, and a pad for cryogenic pumps.
